

► TWENTEBELT WIRE MESH BELTS

Endless connection by weaving in a wire rod

1. 
 - Separate a wire rod from the belt and position the belt ends parallel to each other
2. 
 - Connect both belt ends by weaving in the wire rod, starting from the middle section
3. 
 - Continue connecting by joining all sections from the middle to both sides and straightening the wire rod if necessary
 - i The use of a long nose plier can simplify the act
4. 
 - Finish by connecting the edges on both sides of the belt
 - i The use of a screw driver can simplify the act
 - Your Twentebelt Wire mesh belt is ready for use
